

Linear Systems Learning Goals

Day	BY THE END OF CLASS TODAY, YOU SHOULD BE ABLE TO:
1	<ol style="list-style-type: none">1) Solve a linear system by graphing.2) Identify whether a point is a solution to a system or not.
2	<ol style="list-style-type: none">1) Solve a linear system using the comparison method.
3	<ol style="list-style-type: none">1) Solve a linear system using the substitution method.

4	1) Solve a linear system using elimination.
5	<p>1) Choose, and use, an appropriate method (comparison, substitution, elimination) to solve a linear system.</p> <p>2) Interpret a word problem, given its equations, and describe its solution.</p>
